Overnight Underwater Pool Repair Services

A Unique Pool Service

Using techniques and experience gained from the North Sea commercial diving industries, UPS Underwater Pool Services is able to solve the majority of pool repair problems by working underwater, eliminating the need to drain the pool. This has major advantages over conventional methods, and offers significant benefits to pool and leisure centre managers.

Dramatic Savings and Resource Conservation

Cost savings in the order of 80% can be expected compared with the full costs of conventional working. This is especially welcome today with competitive tendering and continual water shortages.

Work carried out in the pool by conventional methods involves the cost of draining, refilling and reheating the pool and adding fresh chemicals. Income is lost and customers inconvenienced while the pool is closed.

UPS Underwater Pool Services' solution eliminates the need to close your pool and incur extra costs and lost resources. The cost of the work carried out is the total cost.

Pool Remains Fully Operational

All UPS Underwater Pool Services' repair and installation contracts are carried out overnight and our personnel ensure that the pool is clean, safe and ready for customer use at the start of the next day. No disruption to customer, no loss of water, and no loss of income.

Rotary drilling

Comparison between conventional and underwater working costs

In situations where it is appropriate to work underwater, very significant savings can be made. The costings shown below here are actual examples taken from our records, which itemise in detail the substantial savings that can be achieved by using our unique specialist underwater repair service.

Conventional Method

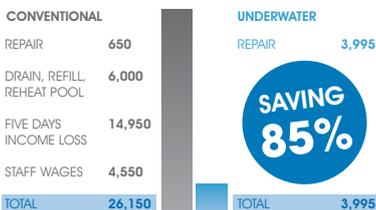

It is essential to take into consideration the full costs which include:

- The actual cost of draining, refilling and reheating the pool water, including the high cost of chemicals and energy involved.
- The loss of income whilst the pool is closed.
- The public inconvenience and possible loss of customers to your competitors.
- The cost of staff salaries and wages for the duration of the closure.

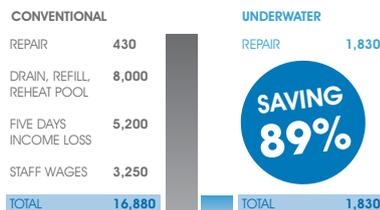

UPS Underwater Method

By working underwater, the pool remains full and totally operational throughout the repair period. There is no subsequent loss of water balance. The only cost incurred is that for the work to be completed. Further details can be obtained by requesting our cost analysis information sheet.

25m POOL WITH DIVING PIT, LONDON REPLACEMENT OF 5m² TILING

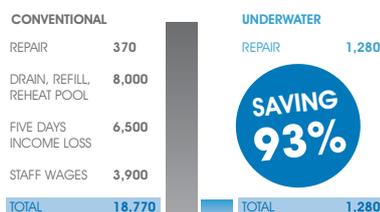

LEISURE POOL, NORTH WEST REPLACEMENT OF 2m² TILING

LEISURE POOL, LINCOLNSHIRE INSTALL 5 TREAD POOL ENTRY STEPS

LEISURE POOL, CITY OF CHESTER REPLACEMENT OF 1m² TILING

**NO LOSS OF
REVENUE
OR
WATER**

1 Planned, Preventive Maintenance Service

A yearly underwater photographic inspection/survey identifies defects which may be occurring in their early stages. This allows for underwater repairs to be carried out without loss of water or revenue, and eliminates the unexpected closure of the swimming pool. In addition to this, budgets can be set for any major repairs which are required in the future.

This is fast becoming our most popular service, as Managers are under increasing pressure to be pro-active.

2 Survey and Inspection

Of all pool support systems (including close circuit TV surveys to establish condition of encased pipework). Underwater surveys complete with objective reports and photographic evidence.

3 Temporary Sealing of Pool Tank

Enables plant room repairs and refurbishment to be carried out without the time and financial penalties of draining the pool.

4 Underwater Pool Cleaning

Underwater removal of pool staining.

5 Regrouting

And replacement of defective or missing expansion joints.

6 Replacement

Of loose and insecure, cracked and broken tiles.

7 All Types of Underwater Drilling

Carried out including diamond core and conventional rotary drilling.

8 Installation

Of pool equipment. Supply and fitting of high performance plastic products and stainless steel fixtures and fittings. Includes handrails, steps, rope land anchors and other grout-fast fixings, inlet and outlet grill.

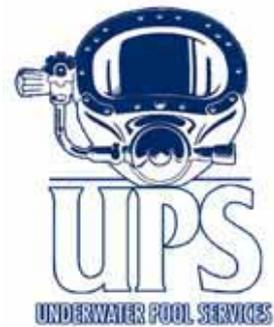

Quality You Can Rely On

Increasingly, Pool and Leisure Centre Managers are achieving BS5750 with regard to quality of service. You can be confident that UPS will consistently deliver work to such high standards, and on completion of all underwater projects will supply a photographic report for your inspection and approval.

Did You Know?

That it is a legal requirement to ensure that all underwater repairs to your pool and other water filled associated areas, should be carried out only by fully professional divers registered with the Health and Safety Executive. Failure to comply with HSE 1981/ Amended 1997 Diving Operations and Regulations may result in fines in excess of £10,000 being imposed.

Professional Divers and Insurances

Working to very exacting standards underwater demands a high level of disciplined teamwork, professionalism and equipment. UPS Underwater Pool Services fulfils these rigorous requirements admirably.

As well as being experienced tradesmen, all UPS Underwater Pool Services underwater diving personnel are professional divers and registered with the Health and Safety Executive as required by law, in order to carry out work underwater (reference: HSE 1981/ Amended 1997(DWR) Diving Operations and Regulations).

The company also carries all the relevant insurances needed for working with both Local Authorities and the private sector. Where required, all UPS Underwater Pool Services equipment and materials conform to the relevant British Standard.

Safety

Safety is a top priority for UPS Underwater Pool Services in all its pool and poolside activities, most especially for future clients who will use your pool.

It is important that managers are confident in the contractor's workmanship, professional procedures and quality of products used, to achieve a durable, safe and attractive finish. UPS Underwater Pool Services professionalism and years of experience ensure that your confidence will not be misplaced.

For replacement or refurbishment projects, UPS Underwater Pool Services can supply a range of ultra-safe poolside products, available in high performance plastic and stainless steel.

The range includes deck level gratings, step assemblies, inlet diffusers and bench seating.

Underwater regrouting

What Clients had to say about UPS:

Underwater Core Drilling at Olympic Swimming Pool, Ponds Forge, Sheffield, England

"I was very pleased with the work carried out, it was extremely well done and we would like to commend them for the long hours, hard work and the neatness. These men worked very hard in order for the work to be completed."

Sue Nickson,
Duty Officer,
Caerphilly Leisure Centre

"I would like to thank you and your workforce together with your subcontractor for their efforts in addressing the various problems which were encountered and for the unsocial hours worked to keep the closure period to a minimum"

G W Gray, Building Surveyor
for Head of Property Services,
Borough Council of
Wellingborough

"I've always found UPS diving services to be very professional, their risk assessments are always in place and their documentation is excellent. Their workmanship is also of the highest quality and office back-up very helpful."

Mark Seltzer,
Facilities Manager,
London Borough of Newham.

"When our staff arrive in the morning, they are delighted to find that everything has been tidied up, and all repairs and replacements complete and the pool is ready for use by the public. We are extremely pleased with the efficient and effective work done by your company and would have no hesitation in recommending UPS to anyone else requiring similar work to be done."

Jan Walker, Community Education
Co-ordinator, Chard Recreational
Educational & Sports Trust Assoc.
Chard Somerset

"I would like to express our thanks to you and all your staff who carried out the work on our pool. Please extend my special thanks to Taffy and Sean, who were most helpful to both myself and the rest of the staff here. Their workmanship was excellent, and on completion of the work both the pool and the poolside areas were thoroughly cleaned with all the debris taken away. We would not hesitate to use UPS in the future."

Pat Delaney, Pool Manager,
Royal Air Force, Glamorgan

"Just a note to say the diving team did an excellent job. They were very professional, helpful and versatile in their approach. The finished grouting was to a very high standard but we still have a lot more work to do. I will be talking to our Technical Services Manager to organise a new order to complete the outstanding items. But can I personally request we get the same team back in the future."

Mike Walls,
Pool Manager,
Center Parcs
